

Figure 1 is a line graph showing the age at death (min) for four groups of mice: control (green), 100 mg/kg (orange), 200 mg/kg (blue), and 400 mg/kg (yellow). The x-axis represents age at death in minutes, ranging from 0 to 600. The y-axis represents the number of mice, ranging from 0 to 10. All groups show a sharp decline in survival starting around 240 minutes, with the 400 mg/kg group showing the earliest and steepest decline.

Age at death (min)	Control (green)	100 mg/kg (orange)	200 mg/kg (blue)	400 mg/kg (yellow)
0	10	10	10	10
120	10	10	10	10
240	10	9	8	7
300	9	7	6	4
360	5	4	3	1
420	1	1	1	0
480	0	0	0	0
600	0	0	0	0
